

March 26, 2020

While the health and safety of our staff and our business partners is at the forefront of our mind, business continuity is also of paramount importance. We have been working to ensure that we can continue to provide service to our clients even as social distancing mandates impact the community. CTL|Thompson has the technology to allow our engineering staff to work remotely. You should be able to contact any of the engineers through their email or the normal office phone system regardless of where they are working. We are encouraging our staff to work from home and to utilize teleconferencing to attend client and project meetings to minimize personal contact. Our drill crews are working, and our laboratories are open and fully functioning. Our construction observation and materials testing services are operating normally with additional health and safety precautions and social distancing protocols. We look forward to working alongside you as we weather this crisis and build toward the future.

Stuart Thompson
President and CEO
CTL|Thompson, Inc.
