CTL | THOMPSON OPENS SUMMIT COUNTY OFFICE

Breckenridge location enables firm to better serve its mountain clients

(DENVER – April 7, 2014) CTL | Thompson (CTL), a full-service geotechnical, structural, environmental and materials engineering firm, has opened an office in Breckenridge, providing another opportunity to serve its clients in the mountain regions.

CTL's Summit County office – located at 1790 Airport Road, just north of the town of Breckenridge – will focus its efforts on commercial and residential geotechnical work, phase 1 environmental work, structural design, geotechnical reports and septic system design. It opens with two employees and will grow during the summer to include a total of three to five engineers and employees.

The location is the company's second in the mountain region, along with its office in Glenwood Springs. The Breckenridge location will be managed by associate engineer George Benecke, who recently joined the firm. For the past four years, Benecke ran his own company, Silverthorne-based Gore Range Engineering, which focused on residential and municipal geotechnical work that included foundation and pavement studies, retaining walls, slope stability, septic design and subsurface drainage. Prior to that, he worked in Summit County for geotechnical firm Hepworth-Pawlak.

"The addition of a Summit County office will allow CTL to bring its depth of geotechnical expertise to developers, contractors and builders throughout the I-70 corridor," said Stuart Thompson, president of CTL | Thompson. "George Benecke brings very specific regional knowledge, and we know our new and existing clients will appreciate the additional expertise and convenient location."

About CTL | Thompson

CTL | Thompson is a full-service geotechnical, structural, environmental and materials engineering firm. Established in 1971, the firm currently employs 165 technical and non-technical employees and provides expertise in small and large-scale projects in all areas of construction.
